PETROLEUM & PETROCHEMICAL PRODUCTS

2025 - 2026

Get to Know Us!

Introduction

Welcome to ICM Technology - your go-to source for petroleum and petroleum derivative products.

1

About Us

ICM partners with BP Energy Development & M Energy Asia Limited (MEA), specializing in crude and petroleum sales.

2

Mission & Vision

We enhance infrastructure with client-focused, innovative solutions, fostering trust and collaboration.

3

The Products

We provide a wide variety of high-quality petroleum and derivative products to meet your needs.

4

Entrepreneurialism

We emphasize professionalism, personal ownership, and an entrepreneurial spirit while prioritizing safety and well-being for success.

5

Openness

We prioritize open relationships and communication, emphasizing values, integrity, cooperation, transparency, and mutual benefit.

JET FUEL AVIATION INDUSTRY, MILITARY

What is Jet Fuel?

Jet fuel, also known as aviation turbine fuel or Avtur, is a specialized type of kerosene used to power jet engines in aircraft. It's a highly refined petroleum product, typically colorless or straw-colored, and designed for the specific demands of aviation.

Let's See Who We Are?

ICM's collaboration with BP Energy focus on activities in oil and commodities trading and transport and sale of petroleum, natural gas and petroleum products. Using our sector knowledge and global supply base, we source and market commodities to industrial consumers – such as manufacturers, power companies and processors of oil.

Our Services

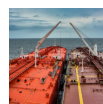

Product Source

We aim to achieve our key deliverables efficiently while maintaining a clear focus on excellence.

Floating Storage Facilities

Floating storage facilities provides solid solution to long-term and/or emergency oil stockpiling in the sea.

Ship to Ship Transfer

Ship-to-Ship (STS) operations for liquid bulk cargo and Liquefied Natural Gas (LNG) within Kuala Langat Port Limit.

GAS OIL

TRANSPORTATION, INDUSTRIAL APPLICATIONS

What is Gas Oil?

High Speed Diesel and Biodiesel (B5) are perfect for high-speed diesel engines 1,000 revolutions per minute. They serve well in transportation vehicles like trucks and trains, and are also suitable for industrial applications such as boilers and direct combustion.

Let's See Who We Are?

ICM's collaboration with BP Energy focus on activities in oil and commodities trading and transport and sale of petroleum, natural gas and petroleum products. Using our sector knowledge and global supply base, we source and market commodities to industrial consumers – such as manufacturers, power companies and processors of oil.

LIQUIFIED NATURAL GAS TRANSPORTATION, POWER IGENERATION & INDUSTRIAL APPLICATIONS

What is LNG?

LNG, or Liquefied Natural Gas, is natural gas that has been cooled to about -260°F (-162°C) to become a liquid. This liquefaction process reduces the volume of the gas by about 600 times, making it economical to transport via specialized ships to regions not reached by gas pipelines.

Let's See Who We Are?

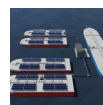

ICM's collaboration with BP Energy focus on activities in oil and commodities trading and transport and sale of petroleum, natural gas and petroleum products. Using our sector knowledge and global supply base, we source and market commodities to industrial consumers – such as manufacturers, power companies and processors of oil.

LUBRICANTS

AUTOMOTIVE, POWER GENERATION & INDUSTRIAL APPLICATIONS

What are Lubricants?

Lubricating oil significantly extends the lifespan of machinery and equipment. Its high-quality formulation helps prevent wear and tear, ensuring optimal performance even in extreme temperatures. Regular use of lubricating oil is essential for maintaining efficiency and reliability in various applications.

HYDRAULICS

AUTOMOTIVE, INDUSTRIAL & CONSTRUCTION APPLICATIONS

What are Hydraulics?

Hydraulic oil is vital for the efficiency of hydraulic systems. Using the wrong oil can lead to serious issues affecting performance. Regular oil changes and proper maintenance are essential for smooth operation, extending the system's lifespan, and improving overall performance.

SUPER TRAC AGRICULTURE SECTOR TRACTORS

What is Super Trac?

Discover our premium multi-purpose hydraulic oil, designed for agricultural tractors. This versatile oil boosts tractor performance and ensures smooth operation in power transmission, shafts, rear axles, and brakes. Rely on our hydraulic oil for efficient equipment operation and enjoy lasting durability!

BITUMEN CONSTRUCTION INDUSTRY

What is Bitumen?

Bitumen is an oil based substance. It is a semi-solid hydrocarbon product produced by removing the lighter fractions from heavy crude oil during the refining process. We and our Global Partners specialize in exporting high quality Penetration Grade Bitumen 50/70, 60/70, 70/100 and 80/100 globally.

UREA N46

AGRICULTURAL & INDUSTRIAL APPLICATIONS

Urea

Commercially, urea is widely used as a nitrogen-rich fertilizer for agriculture, as well as in the production of plastics, cosmetics, and pharmaceuticals. ICM's collaboration with GCC's top Urea and Sulphur exporters offers significant advantages to buyers. This partnership ensures high-quality products, pricing, and reliable delivery.

SULPHUR

AGRICULTURAL & INDUSTRIAL APPLICATIONS

Sulphur

Sulfur is a chemical element that is essential for life, playing a vital role in enzyme reactions and protein synthesis in humans and animals, and as a crucial nutrient for plants. ICM's collaboration with GCC's top Urea and Sulphur exporters offers significant advantages to buyers. This partnership ensures high-quality products, pricing, and reliable delivery.
