

Pre-Fabricated Concrete Bathroom

High Quality / Low Water Absorption

Neobaths are constructed with our innovative concrete formula (Crystal Krete™) using an advance manufacturing process.

Crystal Krete™ is superior in strength, is lightweight, flexible and has very low water absorption ratio.

Advantages of Pre-Fabricated Concrete Bathroom

- High quality, durable, non-water permeable (Single Cast)
- Advanced material and manufacturing techniques
- High strength, lightweight and easy to transport
- Easy to Install, saves time and costs
- All responsibilities for the wet area consolidated at one party, removing errors due to lack of coordination
- Pipes and cables run between the unit shell and the building structure eliminating the need to chisel walls.

Construction Site Benefits

- Shorten schedule time
- Better site management
- Reduce waste
- Save labor cost
- Prefabricated bathroom units can yield both time and manpower savings upto 60%

Superior Sound insulation than AAC/CLC and Clay Bricks

Fire Resistance for more than 4 hours

25% Lighter than Clay Bricks (Per Square Meter)

Higher Compressive Strength than AAC/CLC and Clay Bricks

Low Water Absorption

Effective Heat Dissipation through principal of passive cooling resulting in higher energy savings

Quick & Easy Installation with LINK N LOCK® Technology

Manufactured according to TIS standards.

No Special Plaster or Skilled labour required

Environmental Complaint / Eco-Friendly
